

About Cookies

Cookies are small pieces of data, stored in text files, that are stored on your computer or other devices when websites are loaded in a browser. They are widely used to 'remember' you and your preferences, either for a single visit (through a 'session cookie') or for multiple repeat visits (using a 'persistent cookie').

Cookies are files created by sites you visit. They make your online experience easier by saving browsing information. With cookies, sites can:

- Keep you signed in
- Remember your site preferences
- Give you locally relevant content

They ensure a consistent and efficient experience for visitors, and perform essential functions such as allowing users to register and remain logged in. Cookies may be set by the site that you are visiting (known as 'first party cookies'), or by other websites who serve up content on that site ('third party cookies').

Our website and its functionality plugins use cookies, as does Google Analytics which is linked to the website providing us with data on how users browse the website and to help user experience. The social media buttons also utilise cookies. By continuing without changing your browser settings, you will be agreeing to their use. If you wish to turn off cookies in your Chrome browser:

In Chrome

On your computer, open Chrome.

At the top right, click More  > Settings.

Under "Privacy and security," click Site settings.

Click Cookies.

From here, you can:

Turn on cookies: Next to "Blocked," turn on the switch.

Turn off cookies: Turn off Allow sites to save and read cookie data.
